CUSTOM MADE TRAILER AXLES AND SUSPENSIONS

AS SOON AS AN AXLE IS "NOT STANDARD",
TECMA COMES INTO THE PICTURE.

ABOUT TECMA

Tecma specializes in engineering and manufacturing customer-specific axles and suspensions and, in close cooperation with the vehicle manufacturer, offers customized solutions that fully meet the customer's needs in terms of applicability. With Tecma in the IMS Group portfolio, we offer every customer a “custom made” solution in the field of axles, suspensions and wheel suspensions. As soon as an axle is “not standard”, Tecma comes into the picture!

Tecma has been active in the development and production of custom axles and suspensions for over 30 years. In those 30 years they have grown into one of the most dynamic and innovative companies in this field. Tecma's goal is to offer a perfectly suitable solution that fully meets the customer's wishes in terms of applicability and price. For several years now, IMS Group has been

advising and selling various types of steering systems throughout Europe. These steering systems have already more than proven their added value in various industries such as; bulk transport, container transport, tank transport and distribution. The option to also purchase custom-made axles and suspensions of the Tecma brand from IMS Group is a more than nice addition to this.
